

# Will's Jungle / DnB Play-Along

This play-along track is basically made up of the following two grooves. I like to play the track using two snare drums, but it can be played using just one. Though the [A] & [C] grooves are the same it sounds effective to play the [A] section on a different pitched secondary snare, and the [C] section on your main snare. In the [B] section I play the two snare notes in the middle of bar two on my second snare, keeping the rest on my main snare. Have a look at my video demo to see how I'm using my two snares... <https://youtu.be/x33a2yiyz3>
